Programing

Practice

- After two weeks dealing with R, we are ready to program in R.
- By program we mean, now lets do an actual practice where we will really have to solve a series of problems to come with a final answer.
- So we already know the basics on R and the most important thing, we know how to use the help.

Hands On!!!!

R

Programing
Practice

- Download the word document “Ejercicio de Programacion con R” and the data file “profiles_per_exp_rma.tab”
- Read carefully the document
- Analyze the data as recommended in the document
- Plot the data before and after standardization in a suitable and comprehensive way.
- Which are the three genes with the higher change in their expression?
